SUBJECT: Suspicious Death of Joyce B. (Strouse) Sauter on October 29,  
2005

Cancer did not cause Joyce to die on October 29, 2005. Please bear with us on this. It is important and critical to your investigation, if we may be so bold as to comment. We allege that [REDACTED] either suffocated to death, starved to death, drug overdosed to death, or a combination of all three, Joyce B. Sauter, [REDACTED] and our sister.

We ask that the Medical Examiner's Office determine the cause of death based on a thorough and complete autopsy following appropriate protocols, specifically looking into those areas and ruling each one out (suffocation, starvation, drug overdose or combination of all three). Although Joyce was diagnosed with cancer, the reports appear to indicate that the cancer had stopped spreading. Instead of planning for Joyce's death, as [REDACTED] insisted he was doing, [REDACTED] should have been planning for Joyce to live, something which he did not want to hear. Please consider the following information in any investigation being conducted into Joyce's death.
